Door Traffic

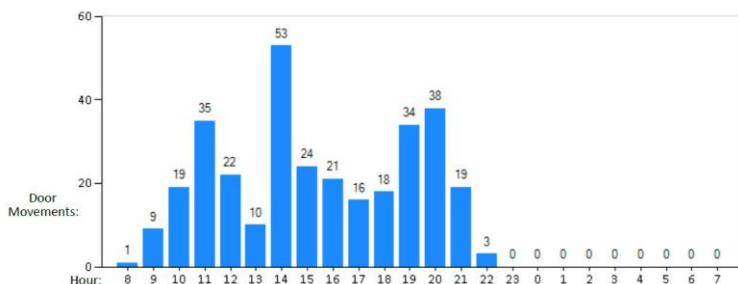

The Door Traffic Device provides information regards how many times the Door had been opened/closed and when was the first Door opening/Last Door closing. This info allows businesses to know when is the bigger traffic to their shop plus when is the exact hour it was opened or closed. The reports are being sent automatically on a daily basis, additional to it a monthly report is also being sent to summarize the monthly traffic. See below an example for a daily report.

Door Traffic Example:

Door Traffic Report Example (Daily):

First Door Movement: 31/01/2016 08:24:03
Last Door Movement: 31/01/2016 22:14:53
Total Door Movement: 322

Door Traffic Report Example (Monthly):
